

# FLY MESH COMPARISON

A common question we get is: *"What's the best fly screen mesh for my home?"*

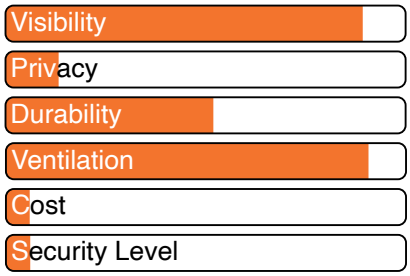

The answer depends on what matters most to you—whether it's insect protection, airflow, strength, visibility, or pet resistance.

The chart below is designed to help you compare the different mesh types and find the right option to suit your home or business.

## STANDARD MESH

# 0.28 mm | 2 years | Not Compliant

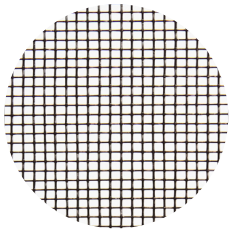

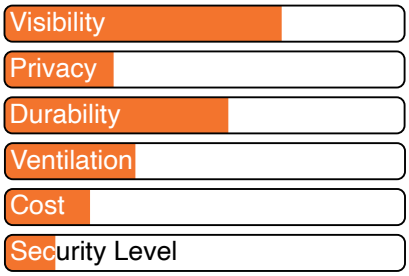

Standard fly mesh is the affordable, durable, and flexible option for protecting your home against insects. This fibreglass fly screen mesh can be placed on a variety of different door and window types.

## SAND-FLY MESH

# 0.33 mm | 2 years | Not Compliant

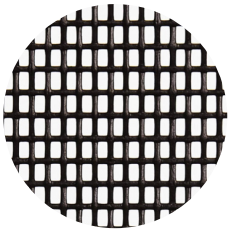

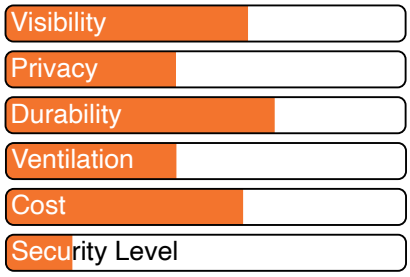

If you are living in an area where midges are a problem, this mesh does a brilliant job keeping them out. However, the tighter concentration of its threads does have an impact on visibility & ventilation.

## PAW PROOF MESH

# 0.64 mm | 7 years | Not Compliant

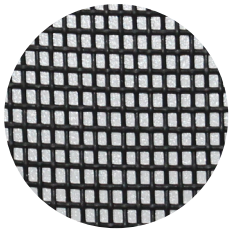

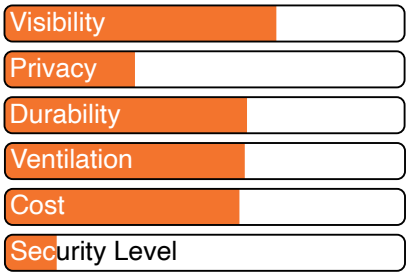

Do you have a furry friend at home? Built to withstand damage from cats and dogs, paw proof insect mesh also does a fantastic job keeping out insects and staying durable against harsh weather conditions.

## PAW PROOF LITE

# 0.46 mm | 2 years | Not Compliant

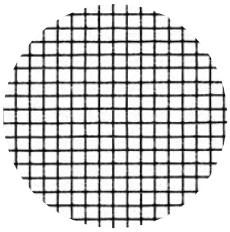

Ideal for homeowners with small pets, the Paw Proof Lite is designed to balance durability, airflow and ventilation. No more compromising a great view or the natural airflow.

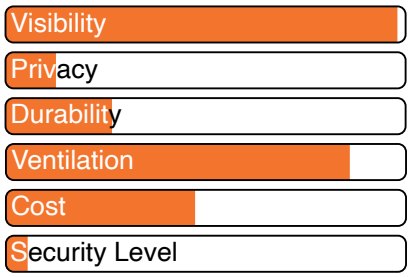

FACTORY FIT SCREENS
SECURITY SCREENS | SHUTTERS | BLINDS

# ULTRAVUE®

# 0.20 mm | 2 years | Not Compliant

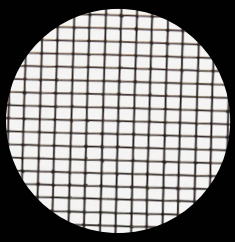

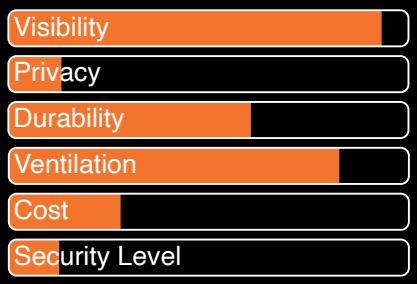

If you want a fly screen that is practically invisible, then UltraVue® by Phifer is one of the best available options on the market.

With a near-transparent design that heavily favours excellent viewing clarity and great airflow, they are perfect for homeowners wanting their doors and window to offer maximum visual appeal, while still keeping the insects outdoors.

# ALUMINIUM MESH

# 0.24 mm | 2 years | BAL 12.5, 19 & 29

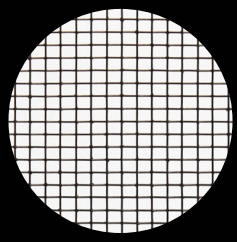

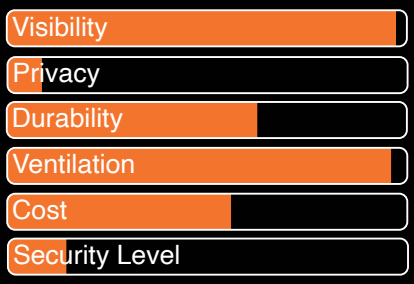

Aluminium Insect Mesh is one of the most durable and stylish fly screens we offer. They are perfect for those living by the ocean or under harsh weather, as they are designed to resist corrosion and wear from UV rays.

# STAINLESS MESH

# 0.17 mm | 2 years | BAL 12.5, 19, 29 & 40

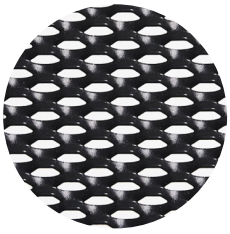

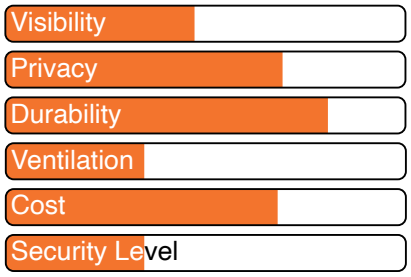

Stainless Insect Mesh is a great choice for home and business owners living in bushfire-prone areas. With a sharp, clean metallic design, this fly screen is the stylish way to make your home bushfire compliant.

# ONE WAY VISION

# 0.60 mm | 7 years | BAL 12.5, 19 & 29

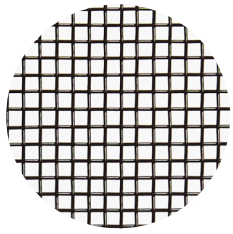

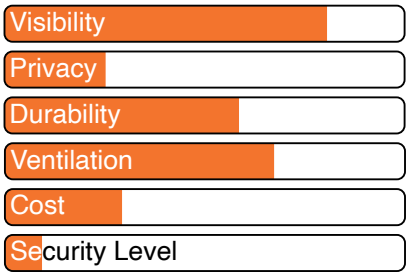

This is the perfect fly screen for anyone who values privacy in their home. Made from aluminium strands that restricts visibility, it is ideal for anyone who lives in high-traffic areas and wish to keep their space secluded from unwelcome eyes.

# PATIO & POOL

# 0.33 mm | 2 years | Not Compliant

Enjoy the majesty of nature while reducing the cleaning up whenever you get a gust of wind. This mesh is ideal for enclosing outdoor spaces and pools from being infested by insects or accumulating leaves and debris.
